Power Tech Mobile Generators

The DIGIMAX® is an advanced, micro-processor based, digital speed reference designed for use with POWERTEC Brushless motors and controls. It is a reliable and repeatable pulse train source with features designed for the needs of computer controlled process lines.

Manuals Powertec - Sam's Fitness

Powertec defines an unauthorized return as any merchandise returned to our facilities without a valid and current RMA number issued by us. Failure to properly mark packages with a valid RMA number, or allowing an RMA number to expire, will cause Powertec, Inc. to consider a return unauthorized.

FitnessZone: Powertec Fitness Home Gyms

POWERTEC's brushless DC motor is designed to operate from standard industry power (230 VAC, 380 VAC and 460 VAC, three phase services) instead of lower voltages and single phase power. Previously, brushless DC motors were limited in frame size. This meant that larger horsepower needed to run at high speed (up to 6000 to 7000 RPM).
