It is well known that the applications of unit operations like Heat Transfer, Evaporation, Extraction, Mixing, Filtration and a host of others are quite common in the pharmaceutical Industry, be it in the production of synthetic drugs, biological and microbiological products or in the manufacture of pharmaceutical formulations.

## ~~Pharmaceutical Biotechnology : k.sambamurthy : Free ...~~

Pharmaceutical processes are validated processes to assure a reproducible product within set specifications. Equally important is the validation of the filters used within the process, especially the sterilizing grade filters, which, often enough, are used before filling or the final processing of the drug product.
